HOPLITE PROTECT

has your business benefited
from switching water supplier?
save up to 25% by
switching providers.

England's non-domestic water retail market was opened in 2017, giving your business the opportunity to choose your preferred water and wastewater retailer. The next price review will take place in April 2020, which should see improved tariffs being offered to businesses.

You're not alone if you haven't switched. Just 13% of businesses have changed to a new water retailer.

The benefits of switching supplier are:

- Price
- Bill Consolidation
- Improved service

At ECA Business Energy we are committed to helping more businesses find their best value water supplier.

Request more information about switching water retailer

SME businesses can save up to 25% by switching providers >

Our specialist team will help your business benefit from better value utilities, and independent energy advice.

ECA have provided excellent customer service, support and advice throughout the process. Because of this the purchase days always run smoothly.

Cancer Research UK

After many ongoing billing issues with our original water provider we decided to investigate the possibility of moving supplier due to deregulation of the market. ECA presented a detailed review of all offers, arranged a meeting with a representative from the new retailer and provided advice throughout the process. Support has been ongoing through ECA's bureau service which has been invaluable in dealing with the migration of our sites.
